

VENUS TOKEN

A Token for Women by Women
to create educational opportunities
towards Empowerment

www.venustoken.net

Purpose

Women in Crypto and Women in Digital have developed a token which will be used to offer educational opportunities for women entering the technology workforce, and specifically in fields of technology such as Digital Marketplaces such as Cryptocurrency, Blockchain Technology, Javascript, Solidity, Ecommerce, **NFT** artwork, machine learning, AI, digital prints, computer technology and much more. This **Educational Token** is made by women for women.

Total amount of tokens **21,000,000**

Initial amount of each token **\$.50**

www.venustoken.net

Objective

To educate women, world-wide in technology and finance.

The Venus Token creates an educational ecosystem, which provides a network of educational opportunities for women, including Coursework and Experiences available including practice and use of Computers, Cryptocurrency, Blockchain Technology, AI, Digitization, Computer Programming, Ecommerce.

Mission

Offering educational and scholarship opportunities for women to enter into industries using technology. Criteria for the specific education and training include technical coursework and financial limitations. Coursework includes but it not limited to programming, e-commerce, blockchain, javascript, C++, java, solidity, cryptocurrency, token development, NFT graphics, graphic design, website design, SEO, financial technology, investments, social media marketing, digital business, electronics, engineering, machine learning, AI and robotics.

Venus Token Holders

By purchasing the Venus token you will contribute towards the Women in Crypto and Women in Digital educational network. This includes available online courses for women and men alike, these educational opportunities offer highly demanded skillsets for placement in highly demanded digital jobs required today and for our future.

VENUS TOKEN is a digital asset running on the pre-existing blockchain of Ethereum. In addition to **VENUS TOKEN**, many different types of tokens run on the Ethereum platform. The VENUS TOKEN has been developed on the Ethereum Network and is classified as a NFT, Non-Fungible ERC721 Token. This standard defines a smart contract framework to allow for the creation, management and trading of our **VENUS TOKENS**.
